

Metabo Product Brief

WPB 36 LTX BL 230

Ergonomically Balanced

- Battery located behind main handle
- Ergonomically designed handle and large controls for use with work gloves
- Rotating handle for better handling during cutting applications

MADE IN GERMANY

Brushless Motor

- Extremely powerful
- Long lasting

LiHD Battery (36V 6.2Ah)

Provides corded-like power and unmatched runtime

Wide Range of Applications

- Compact gear housing
- 9" inch wheels/discs
- 3" cutting depth

Safety Features

- Electronic Safety Clutch: reduces risk of kick-back
- Fast Brake System: stops wheels in under 3-seconds
- Dead Man Switch: fast secure shut down
- VibraTech (MVT) Handle: reduced vibration by 60%

The WPB 36 LTX BL 230... World's First 9" Cordless Angle Grinder

By combining a breakthrough 36V brushless motor and the new High Density LiHD battery technology, we were able to produce a cordless grinder that generates 2400 Watts (21 Amps), which is equivalent to our professional CORDED 9" W 24-230 grinders.

Comparable in size and weight to a professional 9" corded grinder the, WPB 36 LTX BL 230 is remarkably well balanced and easy to use. The integrated swivel handle allows users to rotate the tool into a comfortable position for either cutting or grinding applications.

Additionally the WPB 36 LTX BL 230 incorporates innovative safety features such as an electronic safety brake system that stops wheels in 3 seconds, Metabo's patented electronic safety clutch that helps prevent kick-back, electronic overload protection, soft start and a non-locking paddle switch.

Key Features:

- 36V brushless motor
- 2,400 Watt / 21 Amp, equivalent power to a corded 9" angle grinder
- Swivel handle for comfortable working while cutting or grinding
- Safety brake stops wheels in 3 seconds
- Non-locking paddle switch
- Electronic clutch, overload and soft start

Technical Data	
Battery	LiHD
Voltage	36 Volt
Disc size	9"
No load speed	6,600 RPM
Rated input power	2400 Watt / 21A
Weight (w/battery)	13.44 lbs
